
To create a unified operational manual for the 2.2 billion PeacePreneuring candidates, I have synthesized the uploaded documents (*The Ph.G Standards*, *The NextGenEconomy Business Plan*, and the *Internet Archive Bedrock Strategy*) into a logical, three-phase framework. Deep Dive Narrative Click 2 Hear Master Protocol Gate Engine Bedrock (1).mp3

This document serves as the Master Protocol for the January 16 commencement. Private Tutoring for the 8 x 8 Candidates is Here https://bit.ly/AskTheAiWIzard2025 OR DIY www.authenticatedintelligence.guru

THE PEACE-BASED ECONOMY: Master Protocol

Phase I: The Gate | Phase II: The Engine | Phase III: The Bedrock

---

Phase I: The Gate (The Ph.G Standards)

Source: "The Philanthropreneuring Standard & The 'G' Round"
Before entering the new economy, every candidate must pass the Values-Gate. We move from "charity" to "Philanthropreneuring."

1. **Innovative Enterprise: Move beyond treating symptoms. Your project must be a market-based solution to a systemic problem.**
2. **Sustainable Impact: You must design a system that generates its own economic activity, ending the dependency on seasonal fundraising.**
3. **Measurable Transformation: You must prove a Social Return on Investment ($SROI$) with data-driven rigor.**
4. **Ethical Leadership: You must prioritize Purpose over Profit or Power, demonstrated through community-led decision-making. Sponsored by https://bit.ly/WomenOfWorld2025**

Phase II: The Engine (The NextGenEconomy Plan)

Source: "Deep Dive Digital & The Inclusive Intelligence Platform" Once qualified, candidates adopt the Deep Dive Digital (DDD) business model to fuel their operations.

- **The Model: An "Inclusive Intelligence Publishing Platform" using AiP (Authenticated Intelligence PromptCasting).**
- **The SME/DEI Mandate: * SME: Actively amplify Small and Medium Enterprises within the BRICS+ framework to build a resilient, multi-polar economy.**
    - **DEI: Embed Diversity, Equity, and Inclusion as a competitive strategy to attract top global talent and ensure market-responsive innovation.**
- **Capitalization: Target an initial Seed Round of $1.2M - $1.7M. This is the "bridge" funding required to build the machine that converts capital into systemic change.**
- **The Goal: Graduate to the "G" (Gratis) Round—a terminal, non-dilutive capitalization event provided by "Silent Partners" for permanence and autonomy.**

Phase III: The Bedrock (The Internet Archive Acceleration)

Source: "3-Year Acceleration Plan & Internet Archive Resource"
To ensure the economy is "Peace-Based," the intelligence must be sovereign, transparent, and permanent.

- **Year 1 (2026): Provenance. Use the Internet Archive (IA) to timestamp and "bank" all AiP logs. This creates a "truth-moat" against misinformation.**
- **Year 2 (2027): Interoperability. Integrate IA's Open APIs and Archive-It services. Candidates transition from being consumers of data to being "Data Sommeliers" who contribute verified research to the global commons.**
- **Year 3 (2028): Sovereignty. Leverage IA's "Democracy's Library" to build policy-accurate models that cannot be erased or manipulated by commercial monopolies.**

The 16 January "PeacePreneuring" Checklist

To be ready for commencement, candidates must check these four boxes:

1. **[ ] THE MACHINE: Is your project a "machine" robust enough to convert a 'G' Round injection into permanent change?**
2. **[ ] THE AUTHENTICATION: Are you using PromptCasting to ensure your data has a verifiable provenance?**
3. **[ ] THE INCLUSION: Does your plan specifically empower SMEs and U40 talent from the 2.2 billion candidate pool?**

4. **[ ] THE ARCHIVE: Is your "Proof of Impact" being archived on the Internet Archive to ensure it remains a public good forever?**

"The Ph.G is not an award; it is a certification of readiness for the Peace-Based Economy." https://bit.ly/m/pièce-de-résistance-2023
